SUMMARY

Data Analyst with expertise in data extraction, transformation, validation, Data Analyst skilled in SQL, Python, Excel, Power BI, and Tableau with experience in data analysis, visualization, and business intelligence. Experienced in data cleaning, EDA, data modeling, dashboard development, and automation using Pandas and NumPy. Strong analytical and problem-solving abilities with and reporting to drive business decisions.

EDUCATION

Mahendra Institute of Technology

Namakkal, TamilNadu

B. Tech Information Technology - CGPA: 7.7/10 - 2022 - 2026

EXPERIENCE

Data Science Intern | Cognifyz Technologies.

Sep – Dec 2025 -

-Developed a Machine Learning-based Recipe Recommendation System to suggest recipes from user ingredients. Used Python, Pandas, NumPy, TF-IDF, and Cosine Similarity for data processing and recommendations.

-Built a Demand Forecasting Model using XGBoost to predict product demand from historical sales data. Performed data preprocessing, feature engineering, and EDA using Python, Pandas, and NumPy.

PROJECTS:

Social Media Performance Dashboard | Power BI: Developed an interactive dashboard to track engagement, reach, followers, and post performance using Power BI.

Recipe Recommendation System | Python (Flask), HTML, CSS, JavaScript, Deep Learning

-Developed a dynamic recipe recommendation web application that helps users discover recipes based on available ingredients through an intuitive and user-friendly interface.

-Built a Flask-based full-stack application with responsive frontend design, efficient recipe search functionality, and structured data management to enhance user experience and accessibility.

Demand Forecasting System | Python, XGBoost, Streamlit, Machine Learning

-Developed a machine learning-based demand forecasting system using XGBoost to predict future product demand and support data-driven inventory planning.

-Built an interactive Streamlit web application with data preprocessing, real-time demand prediction, and dynamic visualizations to enhance forecasting accuracy and business decision-making.

Employee Payroll & Attendance Analysis | Pandas

-Cleaned and analyzed 4,000+ employee payroll and attendance records using Pandas. Performed data preprocessing by handling missing values, removing duplicates, and formatting data to ensure accuracy. Analyzed attendance trends, leave patterns, and payroll details, and generated reports to support data-driven decision-making.

TECHNICAL SKILLS

Languages: Python, SQL

Data Analysis & Statistics: Data Analysis, Statistical Analysis, Probability Analysis Data Cleaning, Data Preprocessing, Feature Engineering, Exploratory Data Analysis (EDA), Data Wrangling, Data Management, Problem Solving, Data Extraction, Data Transformation, Data Validation, Snowflake.

Data Science & Machine Learning: NumPy, Pandas, Scikit-learn, Machine Learning, Deep Learning, Predictive Modeling, NLP, TF-IDF, Cosine Similarity, CNN, EfficientNet

Data Visualization & BI: Power BI, Tableau, MS Excel, Dashboard Development, Data Visualization, Reporting, KPI Tracking, APIs

Databases: MySQL, PostgreSQL, MongoDB, Database Querying, Data Extraction

Cloud & AWS: Amazon web Services(AWS), AWS EC2, AWS S3, AWS IAM, AWS Lambda, cloudWatch, AWS CLI, AWS Deployment & Cloud Infrastructure Basics

Tools & Methodologies: Git, GitHub, Agile, Jira, SDLC, Version Control, Jupyter Notebook, Google Colab

Soft Skills: Problem Solving, Analytical Thinking, Communication, Teamwork, Time Management, Adaptability, Critical Thinking, Attention to Detail, Presentation Skills, Business Requirements

Languages: Tamil (Native), English (Professional Proficiency).

CERTIFICATIONS

Power BI: E-Learning Platform – 2025

Introduction to Data Science: Login360(Chennai) – 2026

Machine Learning Internship Certificate : Cognifyz Technologies – 2025
